In today's ever-changing business environment, the ability to quickly adjust to new situations is a cornerstone of success.

With employee turnover, temporary workers and multiple shifts being a reality for many businesses, the versatility of T-4™ Freestanding, Adjustable Desking is one of the best ways to keep up.

The T-4 worksurfaces have the unique adjustability, from 22" to 41" in height, depending on table style chosen, to accommodate any worker who needs to use the surface. This ensures an ergonomically sound environment in which the comfort of multiple users helps maintain efficiency and productivity.

This adjustability can also help you reduce the life-cycle cost of your office furniture. Now, the individual user can adjust his or her own desk.

Perhaps most importantly, the T-4 adjustable work surfaces are built to last. Tighter specs and higher quality standards mean these desks are rock-solid surfaces that can handle large, heavy monitors and many years of use without wobbling, rocking, or shifting, extending the usable life of this furniture.

T-4 Freestanding Adjustable Desking from OEI is the perfect combination of flexibility, affordability and performance. These worksurfaces fit any office environment, making employees more comfortable and more productive.

Tables come with 2 locking and 2-4 non-locking casters depending on the table style. Tables with casters have the same worksurface height as tables with glides.

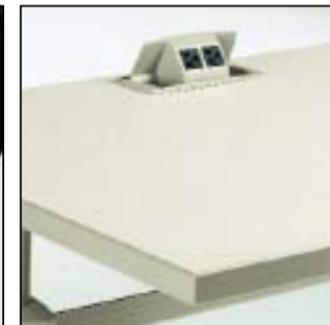

Adjustable glides allow for 1" of adjustment on uneven floors.

The optional wire trough provides storage for all your wire management needs.

Stylish modesty panels can be ordered with or without wire management troughs.

Optional PowerUp® unit provides 2 receptacles along with 2 data/communication jack locations on the worksurface. Retracts flush with tabletop when not in use.

Dual worksurfaces adjust from 5" above to 5" below worksurface height. Pneumatic gas cylinder assists in lifting motion and provides +/- 15 degrees of tilt.

T-4 Desking offers an attractive fixed leg to complement the adjustable bases. Create your office using adjustable and fixed desking options.

Pin adjustable tables adjust easily using a spring-loaded pin which pushes in so you can raise or lower table height and lock it back in place. Height adjusts from 24"-31".

Adjust height with ease on the crank adjustable tables. Simply turn crank to easily raise or lower the desk. Height adjusts from 22"-33".

Adjust height with the touch of a button on the electrically adjustable T-4 table. Deluxe switch allows for four separate preset heights. Height adjusts from 27"-43".
