## CHOICES

**Volition™ Free Standing Desks** put you in charge. With a vast array of sizes, shapes, colors and features, you have the opportunity to choose the perfect desk for your office. Free standing, modular componentry allows **Volition** to fit the individual needs of the end user. Available in 24 paint colors, 5 trim colors and all standard laminate and fabric offerings, **Volition** is at home in any office decor.

Beyond the simple rectangular work surface, **Volition** gives the end user the choice of many transition, peninsula and corner work surfaces. In addition, various conference ends and transactional work surfaces can be added on.

**Volition** can also be used with most panel systems, including PowerWorks® configurations. Overhead units, tool rails, tackable privacy screens, task lighting, shelving, paper management systems and much more are all available, making **Volition** the ultimate in versatility.

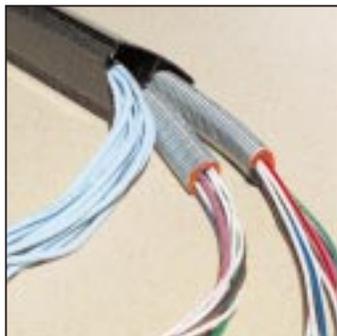

Simple, Flexible, Modular. **Volition Desks** work in any office system. As needs change, **Volition Desks** can be configured to meet them.

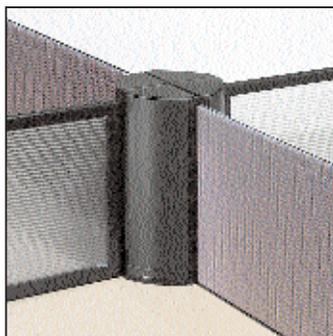

Power poles fit neatly into the worksurface grommet to allow ceiling feeding of power and data.

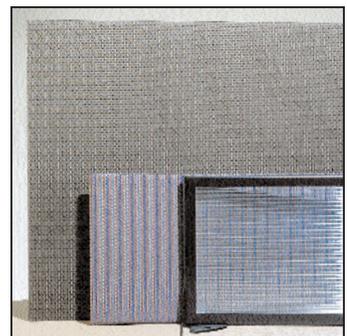

Optional tool rails can be placed at many different heights to suit the user.

Many combinations of power and data can be run in the power poles. Data cables are separated by an aluminum divider from the steel sheathed power.

Power stanchions can be used to create a solid 4-way privacy screen intersection.

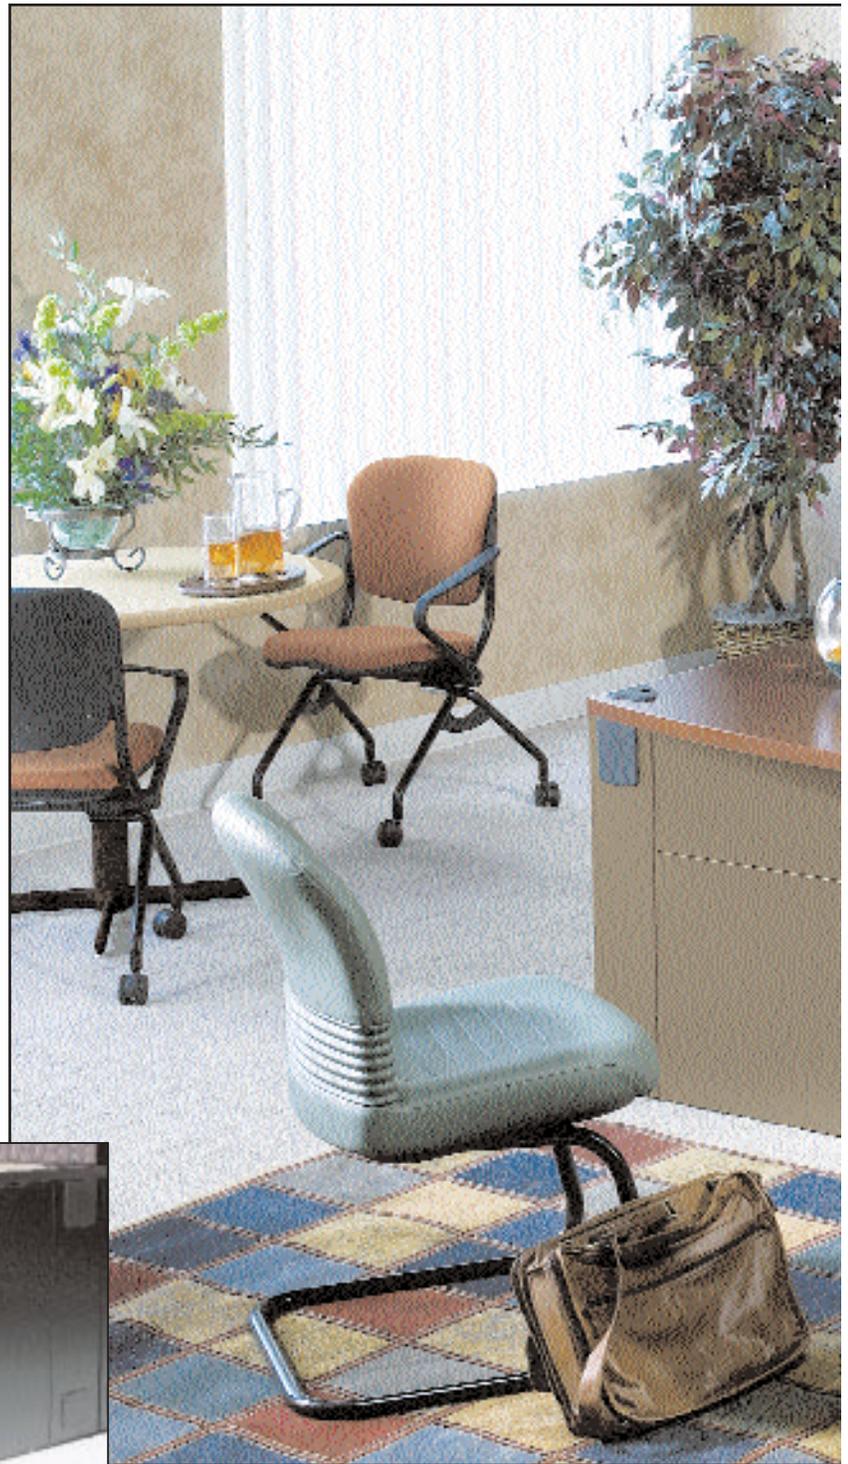

A variety of height and width screens in various materials are available to create either a semi-private or a fully private work environment.

### POWER

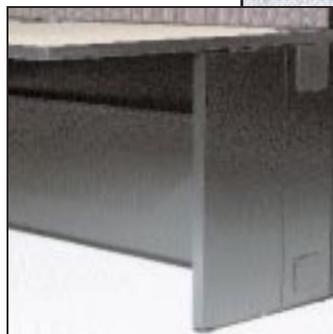

The electrical and data capabilities of **Volition** are state-of-the-art. Based on a ten-wire electrical system, **Volition™ Desks** can be configured with four or six circuits to accommodate computers, printers, lighting, and much more. Power and data outlets can be hidden above or below the work surface to maintain the clean look of the end user's office.

**Volition** delivers many convenience and safety features for the electrical and data systems. Wire troughs and cord dumps keep cables organized and out of the way. Stanchions that support overhead units also house electrical and data receptacles, bringing unsurpassed flexibility to the end user.

The modern office requires power and data integration. The versatility of **Volition** provides unlimited options for user-friendly work surfaces.

Full end panels enhance privacy and provide full enclosure when desired.

Partial end panels can be configured at desk intersections to allow for greater leg room.

Desktop grommet covers easily open and close to allow access into the desk legs and wireways.

Power and data modules are easily relocatable and configurable for multiple user needs.

## INTEGRATION

**Volition** is a perfect marriage of form and function. Its top-end fit and finish sits on an incredibly durable and easy to assemble steel frame. It offers unlimited possibilities when designing all types of work environments, everything from reception areas to an executive office.

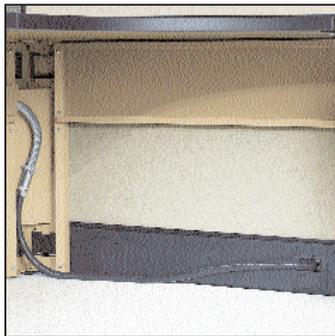

Providing a comfortable, integrated work area that accommodates electronics and still portrays a stylish, contemporary image is a continuous challenge for facility planners. Work areas must also have the ability to adapt and change as needs grow. The simplicity, flexibility and design of the **Volition™ Desks** deliver the solution.

Workstation components including worksurfaces, overhead storage and electrical can be interchanged with

other OEI systems which enhances the facility managers ability to integrate new and old product inventories.

Power from other OEI systems can be easily integrated into the **Volition Desks** as well. Power cords, data cables, telephone lines and more are hidden in cable troughs, behind stanchion covers, or along modesty panels to maximize your work surface and keep it free of clutter.

With multiple colors and finishes, painted or upholstered frames, electrical routing systems, and the compatibility with many panel systems, **Volition Desks** meet the ever-changing needs of today's professional.

Power from other OEI systems products can be integrated easily to power Volition workstations and vice versa.

System XX<sup>®</sup> and PowerWorks<sup>®</sup> panels attach neatly to Volition with an attachment bracket.

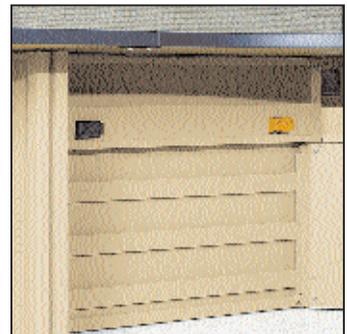

Power cord clutter is reduced by hiding excess cabling behind stanchion covers.

Partial modesty panel option shown on the left and full modesty panel option shown on the right, give the user a choice depending on where the desk is placed.

Optional cable troughs with full covers are available for situations that warrant it.

Power is available under the worksurface of Volition where it is easily accessible.
